

What can we expect from an antidepressant with a multimodal activity in the treatment of major depressive disorder?

Innovation Showcase session on the occasion of the 32nd ECNP Congress with financial support provided by H. Lundbeck A/S

Professor Roger McIntyre MD

Monday 9th September 2019

12:00 – 12:30

The Bubble
Bella Center Copenhagen, Copenhagen, Denmark

Major depressive disorder (MDD) is a multidimensional disorder consisting not only of mood, but also physical and cognitive symptoms.

In this Innovation Showcase we will discuss what can be expected from a multimodal antidepressant in the treatment of major depressive disorder.

This Innovation Showcase will be reported to ENLI prior to the session which in Lundbeck's opinion complies with the applicable rules.
